Antigua

(B) To-day mixture of sunsets & fog with bright green, dark blue & red  
 Leamy Guatemala City m. 1  
 Superb effect of volcanic  
 across foggy valley. Dark ridge  
 with white & yellow & red knobs  
 on high sunny light against  
 fine fog from base of peak.  
 First view. This ridge with  
 short bushes trees & brown  
 slopes, all bathed in misty light  
 & in foreground volcanic cliffs  
 with water dripping.  
 Later baranca walks in fog  
 with lots of platan flowers  
 showing dark against foggy  
 mudda ridge.

are not over 30 feet in height  
and are rounded on the edges and  
generally, are oval.

There are no traces of buildings or of  
cut stone and it is difficult to say  
whether any of the mounds had buildings.

Guatemala City site  
W. Holmes Feb 28 1895

Here the ancient mounds extend over an area of a square mile or more and 40 structures of varied shapes are in view from a single point. There are doubtless many more beyond the range of vision and hidden in the Ranchero clusters. The fields are flat with dark black soil and all in corn now gathered.

### The Mounds

The majority are conical and oblong conical. The highest conical is about 80 feet in height & very steep, this and others having a slope of  $45^{\circ}$  or more. Most of the conical ones are from 20 to 50 feet in height. The flat mounds
